

Sex and Lipids 2026

Managing CV Risk in Women

Wednesday, March 11, 2026

7:30 - 9:00 pm EDT

**In recognition of International
Women's Day 2026**

This case-based virtual program will explore practical, evidence-based strategies to manage cardiovascular risk in women, with a focus on lipids and the menopause transition.

Session Objectives

- Apply gender-specific risk stratification strategies for managing dyslipidemia in women
- Manage lipid-lowering therapy for women in high risk primary and secondary prevention
- Discuss menopause transition and its impact on cardiovascular risk
- Review the role of menopausal therapy and its effects on cardiovascular risk
