PROGRAM LEARNING OBJECTIVES:

Following participation in this program, participants will be able to:

- Evaluate the roles and limitations of diagnostic tools for detection of ovarian cancer and for predicting response to treatment regimens
- Define the prognostic implications of residual disease following surgery
- Recognize the importance of genetic testing to guide management
- Determine the role of available treatment options, including PARP inhibitors, for the treatment of ovarian cancer
- Recognize and address psychological distress after cancer diagnosis/treatment and refer to appropriate resources
