Nutrition Theme Lead, MD Program,
University of Toronto
Toronto, ON

Join this engaging discussion to explore the potential role of plant sterols for LDL-C and CV risk management in patients unable to reach target with traditional pharmacotherapies.

Learning Objectives

Following participation in this program, participants will be able to:

- Review the mechanism and efficacy of plant sterols in LDL lowering
- Discuss dietary and supplement options to increase plant sterol intake
- Explore patient profiles eligible for plant sterols
