7:00 - 8:00 pm EST

Join this engaging discussion to review practical strategies for managing symptomatic UTIs in primary care and explore the role of Pyridium for relief of urinary tract pain.

Learning Objectives

Following participation in this program, participants will be able to:

- Review practical approaches to diagnosing and managing symptomatic UTIs in primary care.
- Discuss the role of Pyridium as an adjunct to antibiotic therapy for symptomatic relief in UTIs.
- Assess the use of Pyridium for post-surgical urinary tract pain and chemotherapy-associated urinary symptoms.
